

SEATTLE LIGHTBEARERS

4126 Arcade Bldg. - MAin 9134

**SCIENCE OF BEING**  
**BY**  
**EUGENE FERSEN**

**DO** you actually live your life or do you spend your time dreaming of yesterday's happiness and tomorrow's rainbow?

*SCIENCE OF BEING* will redirect the energy spent in day-dreaming into the constructive activities of the ever-present NOW.

**Do you attribute your failures to luck or "the breaks"?**

*SCIENCE OF BEING* will positively dismiss these shams. It will actually shame you into becoming resourceful and self-reliant.

**Do you fear Death?**

*SCIENCE OF BEING* will shape your mind to regard it as an interesting adventure.

**Do you realize your own individuality? You are original—unique—not another person in the world exactly like you. Do you make this fact count for you?**

*SCIENCE OF BEING* will nourish that divine spark of individuality into a powerful, compelling fire of Personality.

**Have you moved forward in a manner commensurate with your age and ability, or are you standing still?**

*SCIENCE OF BEING* brings your latent qualities to the surface, enabling you to determine whether or not you are doing the type of work best suited to your temperament.

**Is your circle of friends ever widening? Do you inspire love and confidence?**

*SCIENCE OF BEING* will teach you how to attract human affections.

**Do you find it hard to reconcile the idea of an immortal Soul with your every-day experiences?**

*SCIENCE OF BEING* will enlighten you as to the existence and immortality of the Soul.

---

SCIENCE OF BEING is a rare combination of deep knowledge of Universal Forces and Laws and of Inspiration, through which the Fundamentals of All Being were perceived by the author. It is a complete science, a unique work, which, from beginning to end, shows perfect logic and unity, unfolding gradually before the reader all the so-called Mysteries of Human Existence which have been presented before at various periods of Humanity's Evolution in a veiled form, in allegories, discernible only by those who could fathom their inner meaning. SCIENCE OF BEING takes away that veil of mystery from everything it touches and presents to the world a simple, clear, and at the same time complete interpretation of the invisible Universal Forces and Powers and their visible operation in Nature and in the lives of human beings. It explains the Fundamentals of all Existence. It unveils the origin of Man and adjusts his relation to his fellow beings and to the World in which he lives. It elucidates the different Laws which underlie and govern all Creation. It unearths the limitless treasures of qualities and powers which Man possesses at his very birth, and furthermore it sets forth simple and direct methods for putting into practical daily application those wonderful Forces and Laws.

This Science brings out individuality and renders personality attractive. Above all it guides toward Peace and Happiness, which is the goal of all, rich or poor, high or low, learned or ignorant, but which can be reached only if perfect equilibrium is established within, as well as without, the individual. Equilibrium means Power, means Freedom. Through separation from the Universal, Man has lost his equilibrium. SCIENCE OF BEING teaches how to regain it, how to become again One with the limitless Forces of Nature. This is the Supreme Goal of everyone living on this earth, and it is this goal which SCIENCE OF BEING enables all those who sincerely follow its teaching to reach. It is the priceless Key to All Power.

The SCIENCE OF BEING is neither a miracle nor an experiment. It is not a miracle, since it simply takes as its premise the fact that in every man and woman there are certain hidden forces which can be developed. It is not an experiment, since the principles it teaches have been presented in class and lecture form by Eugene Fersen during the past five years, to large audiences in most of the important cities of America, and have been successfully put to the proof by everyone whom need, interest or ambition has prompted to apply them in their own daily life. So definite and positive a reaction occurred that centers for the spread of this Science were established in some thirty cities of the United States, and an international organization called THE LIGHTBEARERS sprang into being, with educational and humanitarian purposes, having its headquarters in Washington, D. C., and selecting Eugene Fersen as its president.

As the object of this organization is the spreading of these invaluable teachings throughout the world, it became imperative to put them in print. They are now available in the work called "SCIENCE OF BEING." This is a brown lizard calf covered book, with brown and gold print, designed to show to the best advantage on an ivory India Bible paper. The illustrations by Malcolm Thurburn, the perfect type and design, the silken lining, the size and make-up of the pages—all contribute toward making it a real treasure.

## WHAT THE PUBLIC SAYS ABOUT THE BOOK

VANCOUVER, B. C.—I have already read the book twice, and to me it is beyond monetary value. It is logical and scientific.—Mr. A. S.

CAMP ALFRED VAIL, N. J.—I feel that you have made an invaluable contribution to the knowledge and power of the world, and that your book will take its place as one of the most significant works of this generation. In addition to its epoch-making contents, the book is a masterpiece of the publisher's art. I do not see how its form or appearance could be improved upon.—Mr. G. B. L.

PASADENA, Cal.—It is quite the most beautiful book I have ever owned as regards binding, lettering, etc., and the contents are most satisfying. The friends who have purchased the book, due to seeing our own, all feel that they are being tremendously helped, as do my husband and myself.—Mrs. A. R. P.

PINEHURST, Wash.—The vibrations from the book, "Science of Being" do wonders for me. I can lay the book any place on my body that is in pain, and, like magic, the pain disappears.—Mrs. L. S.

ROCHESTER, N. Y.—It is as near perfect a work as I can imagine to be humanly possible. I expected something remarkably fine, but it surpassed my highest expectations—its material beauty, the beauty of thought and word, its coherence, unity and emphasis, are remarkable.—Mr. R. L. B.

SEATTLE, Wash.—For several years I have been studying all kinds of teachings. The "Science of Being," however, has been to me the crown of the whole series—and far more. It puts vitality—life—into everything. I have used it in every way and found it equally good for all.—Mrs. A. M. H.

LOUISVILLE, Ky.—Same is a masterpiece and will be truly treasured by the owner. The phraseology and diction are perfect. The physical appearance, the mental atmosphere it vibrates, its spiritual teachings, could not possibly be housed in an ordinary "make-up" and made to fit the occasion.—Mr. J. I. L.

CLEVELAND, O.—The knowledge gained through "Science of Being" enabled me not only to benefit myself, but also to assist many others who were in need physically, morally or financially.—M. A., C. L. B.

COLUMBUS, O.—You are to be congratulated upon the beauty and perfection of the art and workmanship of the little volume, and a thousand times more on the force and strength and power of the message it contains.—Mrs. D. E. S., C. L. B.

WASHINGTON, D. C.—Eugene Fersen's "Science of Being" is the most comprehensive and practical system obtainable. It is easy to understand and quick to learn by anyone.—A. A. K.

MILWAUKEE, Wis.—Only by reading and study of this book is it conceivable that such profound wealth of practical knowledge can be expressed in so small a volume.—A. H. G.

PORTLAND, Ore.—For twenty years I suffered with the fifth nerve of my face, had operations, teeth taken out, tonsils removed, everything was done that doctors could do, with no permanent relief. After taking up the study of "Science of Being" I have not only been relieved of terrible suffering, but my outlook on life is entirely changed. I feel a great love for humanity and untold gratitude toward Eugene Fersen, and hope with the help of the Great Law to be able to carry on his work.—Mrs. M. W. D.
